- A. I was too busy running. Didn't keep track of time.
- Q. On the far right, it says, "Shallow water, medium water, and deep water." Those were all checked off.

Do you know what that refers to?

- A. No. Because we found him in pretty deep water. Well, actually on the side of the ledge was -- he started from the beginning, he was kind of shallow in the beginning, because he was right on the side of the ledge.
- 9 O. That area where it's marked off, when you filled 10 this out, I take it you filled these out many times? 11
- A. For this one, I don't think I filled this out. 12
- Q. This type of form, you filled out over the years? 13
- A. Yes. 14

- Q. What do you believe that, the "Shallow water, 15 medium water, deep water" to mean? 16
- A. He was close to the ledge. In high or low tide, 17 ledges come down at a slight angle. It doesn't drop off. 18 It goes like this, gradually. As you get further away from 19 the ledge, five, six feet, then it drops. 20
- Q. Is it safe to say that this "shallow, medium, 21 deep water" refers to where the person was located and what 22 22 23 the water depth was?
- MR. MAYESHIRO: Lack of foundation. 24
- A. All I can say, we did find him on the deep side, 25

- "Partially, part cloudy"?
- A. Yes.
 - Q. Would you agree with that?
- A. I can't remember the day. But if it's checked off, pretty much, that's what I would say.
 - O. And how about "variable winds."

Would you agree with that? It looks like "3 to 7 8 15" or "5 to 15."

- A. Hanauma Bay, you never know. It's always, the 9 wind is always swirling, so most of the time, you -- it can 10 get variable. 11
- Q. And do you remember what the ocean conditions 12 13 were like that day?
- A. I would say it was like a regular day. Not super 14 choppy, but it was a little choppy. 15
- Q. Did you perform CPR on the first body that was 16 17 found?
 - A. I don't know, that one. I'm not too sure.
- Q. Why don't we just go to the day of the accident. 19 You were working at 3 Alpha, Tower 3 Alpha, 20

21 right?

- A. Right. Q. And tell me what you first saw with regard to
- these two individuals, like how it all first began.
 - A. Well, like I said, I was sitting in the tower,

Q. Putting aside this incident, just this box. I'm trying to understand what it means when you check it off

A. Well, let me put it this way, then. When I seen him swimming around the point, he looked fine to me. Until 5 you start to climb up the side. He tried climbing up and he fell down. Then I said -- I thought something was wrong, so I sent a guy out.

As he went on the side -- if he was hanging on the side, it was shallow on the side on the reef. If he stood up, he could stand up. As he fell back, he drifted down into the deep side.

- Q. All right. But we'll get to that, the actual incident itself. But my question is with regard to when the lifeguard or whoever fills out these forms checks these off, does this refer to the place where the person was found? As far as how deep the water was? 17
 - A. I would say, yeah.
- O. So the fact that all three, Shallow, Medium, Deep 19 are checked off, you're saying that your understanding is 20 that at certain areas, it was all three, shallow, medium --21
- A. Yeah, as it goes like this. 22
- Q. You're indicating like a slope? 23
- 24 A. Yeah.
- O. The weather condition on this form indicates 25

looking out. And off the corner of my eye, I seen somebod swimming around Witches Brew Point.

He swam a little bit past the point. Well, to me, he was swimming fine. He knew how to swim.

And then I seen him try to climb out to the side of the ledge, grab on and climb out. But when he grabbed on, he was hanging and he just dropped. He just let go, because I guess he was too weak or whatever.

But as soon as I seen them, it struck me as kind of wrong. That day it was Daniel Neves was my partner.

He was at the bottom. I told him, Go. Usually, I tell the guys about scenarios, in case of drownings, just go. Get your stuff. When I say go, just go.

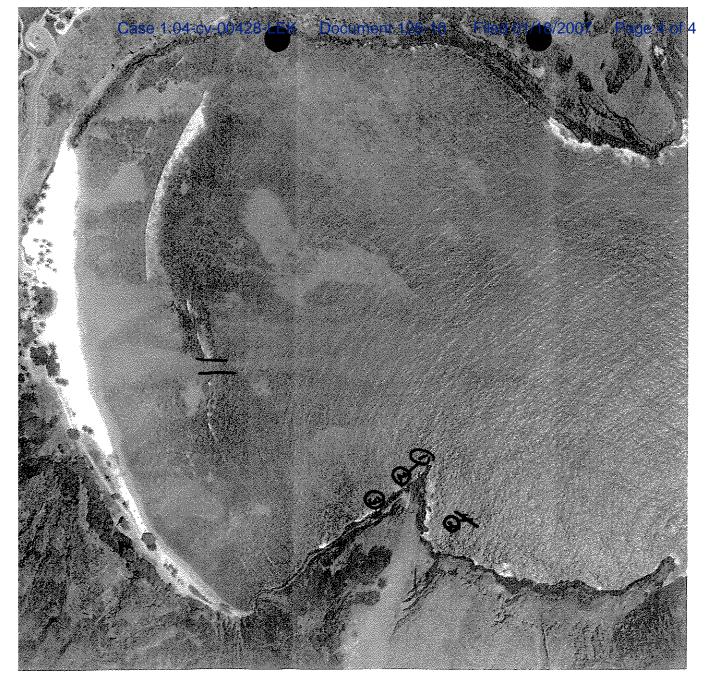

He took off. Got all his gear, and he took off, running. When he was running, I watched the guy; he tried to climb up again. Wait a little while, he was hanging a little bit, and he dropped again.

At this time, when I looked across, Neves had reached the end of the beach.

Q. Okay.

- A. I went back to the guy. I was watching and waiting for him to swim. And I didn't see no swimming.
- But before all of that happened, I did call the supervisor 23
- that there was a possible rescue enroute. So he came 24

25 across.
